

Senior Software Engineer with 8+ years of experience building full-stack products using Python, Django, React, PostgreSQL, and AWS, including HIPAA-compliant healthcare systems and customer-facing SaaS platforms.

Mangomint | Full-time Remote**Senior Software Developer**

Jun 2025 – Present

Product Engineering - full-stack web and mobile development, Kotlin + React + Swift

- Helped launch Mangomint Connect, a HIPAA-compliant communications platform used by 2,000+ businesses, building customer-facing features across web, iOS, and Android applications using React, Kotlin, Swift, and Twilio Voice SDK integrations for VoIP calling; monthly call volume grew from 9,000 to 100,000+
- Contributed to phone-number porting, customer onboarding, and international calling billing initiatives, including Stripe integrations, status tracking, and operational workflows that improved customer visibility and reduced manual support effort
- Investigated and resolved production issues through on-call support rotations using Datadog, Bugsnag, PostgreSQL, and AWS infrastructure, partnering directly with customers and support teams to diagnose complex real-world issues

The Walt Disney Company – Disney Television Animation | Glendale, CA**Senior Software Developer**

Mar 2024 – 2025

Web Software Team - full-stack web app development, Django + React

- Led redesign of the primary dashboard for a studio-tracking application, improving page-load performance by 200% through frontend and backend optimizations
- Expanded Django APIs and React apps to support new studio workflows; established reusable backend patterns, built a Django-GraphQL proof of concept, and integrated with a third-party GraphQL API
- Built the initial React/Django/Nginx platform for visual and forensic watermarking of large video files, including AWS S3-backed media storage and internal user-permission management

Software Developer

Nov 2021 – 2024

- Architected, built, tested, and deployed Django REST API microservices supporting multiple internal applications
- Optimized an application's performance by more than 50% by implementing caching strategies, adding a reverse proxy, and enabling multi-thread request processing
- Developed React and Django internal component libraries, accelerating development and enabling code re-use

Associate Software Developer

Sep 2019 – 2021

- Created and maintained a Django project template containing Docker, Nginx, and CI/CD infrastructure used to bootstrap new applications
- Increased code coverage by 200% in multiple applications that were scarcely unit tested

Radial Analytics | Concord, MA**Software Developer**

Sep 2018 – 2019

- Built and maintained PostgreSQL-backed Django models and ETL pipelines for a HIPAA-compliant healthcare analytics system, transforming Medicare claims data into clinically meaningful patient events used in operational healthcare workflows for hospital discharge management
- Centralized logging infrastructure across AWS EC2 services using Lambda, CloudWatch, and S3
- Upgraded deployment infrastructure to Fabric 2, facilitating upgrade from Python2 to Python3

Junior Developer

Sep 2017 – 2018

- Worked on predictive analytics models using Scikit-learn to identify patients who could safely be discharged home with services, supporting healthcare utilization and care-management initiatives
- Built out Django APIs to efficiently aggregate data into healthcare usage reports and helped develop a patient-matching algorithm for discharge-care eligibility

Technical Skills**Languages & Frameworks:** Python (Django, Flask, FastAPI), TypeScript (React, Redux), PHP**Mobile:** Kotlin (Android), Swift (iOS)**Databases:** PostgreSQL, MySQL**Cloud & Infrastructure:** AWS (EC2, S3, IAM, Lambda), Docker, Kubernetes, Redis, Nginx, Unicorn**Integrations & APIs:** Twilio Voice SDK, Stripe, REST APIs, GraphQL**Tools:** GitHub, GitLab, CI/CD, Datadog, Bugsnag, Jira, Linear, Notion**AI-Assisted Development:** Claude, Cursor, GitHub Copilot**Data & Analytics:** Pandas, Scikit-learn, SAS, Stata, R**Education****Boston University** | Boston, MA | **GPA** 3.94 /4.0 (Summa Cum Laude)

May 2017

Undergraduate Dual Degree Program | B.S. in Health Science | B.A. in Economics
